In the Department of Living Matter Physics (LMP) we seek to fill a number of Postdoctoral Researcher positions.

The Max Planck Institute for Dynamics and Self-Organization (MPI-DS) at Göttingen, Germany, is an international, interdisciplinary and collaborative environment offering an exceptional research setting. It hosts a range of theoretical and experimental fundamental scientific research and a diverse group of researchers. Altogether, it employs about 300 people.

The LMP department engages in a wide range of theoretical research aimed at understanding the dynamics of living systems from a physical perspective. The department currently hosts Ramin Golestanian (director), Philip Bittihn (group leader), Benoît Mahault (group leader), Suropriya Saha (group leader), and a number of postdoctoral researchers, students, and visitors.

The research
The postdoctoral researchers will engage in theoretical and computational research in Nonequilibrium Statistical Physics and Active Matter. For more information, visit our website (http://www.ds.mpg.de/lmp).

Your profile
We are looking for excellent, enthusiastic and self-motivated researchers with relevant background and good communication skills to join our research team.

The ideal candidate should have:

- A PhD/DPhil degree (or comparable) with a background in theoretical physics, applied mathematics or related disciplines from a recognized university;
- Prior experience with nonequilibrium statistical physics and a strong interest in active matter physics;
- Ability and desire to work in an international team on inter-disciplinary research topics;
- Good command of English, which is the working language of the department. German is an asset but not required.

Our offer
We are offering excellent working conditions in a highly interdisciplinary and stimulating research environment. Salary is in accordance with the German state public service salary scale (E13 TVöD-Bund) and the corresponding social benefits. Working hours are full time. We offer opportunities regarding work life balance as well as health promotion services. The postdoctoral position is initially for one year with the possibility of extension up to three years. The starting date is flexible.

The Max-Planck Society is committed to achieving the highest level of excellence and diversity. We encourage applications from women, especially in areas where they are underrepresented, which includes theoretical physics. Moreover, we are committed to providing suitable working environment for everyone including individuals with disabilities.

Your application
To apply, please follow this link with the reference no MPIDS-W075 and submit your CV, publication list, a statement of research interest, and contacts of two referees. In addition to the description of your proposed research, it should also briefly describe your past and current research interests and why you are interested in joining our department. Processing of applications will start immediately, and will stop when the positions are filled. You are encouraged to apply as soon as possible.
